

LUGARDE

Why Lugarde – Key Benefits

1. Why customers choose Lugarde

Lugarde has everything from small [pavilions](#) and [summer houses](#) to magnificent [log cabins](#) used as holiday homes. We also supply luxury summerhouses which can be found in the gardens of European royal families. Lugarde products are versatile, and we can fulfil almost every wish. But what makes us stand out from the crowd? Why do customers choose Lugarde?

1.1 Decades of experience

Since 1978, Lugarde has been producing top-quality summerhouses and gazebos. This expertise is reflected in every summerhouse, right down to the tiniest detail. In the Netherlands and the UK, we are the market leader.

1.2 Bespoke design is standard

About 90% of the products, we make are custom made. With our own factory, we can supply whatever bespoke design is required. Do you want a log cabin with dimensions of 6.31 m x 5.8 m? No problem! And great news... there's no extra charge for bespoke design. With Lugarde, you get bespoke design for the price of a standard model!

1.3 Huge dealer network with show sites

In the UK, Lugarde works with a large network of qualified [Lugarde dealers](#). Our dealers can answer any questions you may have and help you select the right summerhouse, log cabin, veranda or gazebo for your garden. You can come to us for carports and garages too. If you visit a showroom, you'll get a good overview of our top-quality products and numerous options.

1.4 Robust construction system

Lugarde offers four different [construction systems](#).

- The classic, rustic log cabin interlocked system with overlapping corner connections
- Our Prima 3=1 system with stump corners
- The newly developed Pro-system with modern and robust corner posts
- Our brand-new Panel system

The last two systems were developed in-house (the Prima system is patented). You won't find any screws or nails in our walls. This allows for the natural movement of the wood. Nevertheless, our log cabins, summerhouses and gazebos are extremely strong and stable.

1.5 Many extras as standard

It goes without saying that we will always supply a top-quality product. In order to achieve this, many parts are [included in the price](#) as standard. Three-point locks with SKG approval (2 stars), HR++ double glazing in our windows and doors, pressure-treated foundation beams and much more.

1.6 Timber quality

For a top-quality summerhouse, the very best timber is required. Lugarde uses quality timber sourced from northern countries. The cold climate makes the wood extremely strong. All of our [timber](#) is kiln dried in special drying rooms to approx. 14-16% moisture content. This limit shrinking and expansion of the wood and improves its quality.

1.7 Many additional options

We have a wide range of options. This makes us a champion in bespoke design. From robust sliding glass walls, external floors and insulation to an (impregnated) internal floor, with Lugarde anything is possible. Draw inspiration from the [options we offer](#).

1.8 Your own design with our 3D configuration tool

In the summer of 2016, we combined our decades of experience and expertise to develop a unique [3D configurator](#). Design your own personal summerhouse with your PC or tablet and watch all your changes on a 360-degree model.

1.9 Sustainability

Sustainability is an important issue for us. That's why we only buy from PEFC/FSC certified timber suppliers. Our modern techniques allow us to limit waste and reuse residual waste. In addition, for every tree felled, we replant 1.2 new trees.

1.10 Guarantee

The fact that we stand behind every product we produce allows us to provide a 5-year guarantee on all our products. Learn more about [our guarantee](#).

Customer benefits - Many options included

At Lugarde we offer a high-quality product for a reasonable price. In our own factory we make first class quality products. We have an eye for detail. This quality and attention to detail is reflected in the finished product. You'll notice it immediately in all of Lugarde's [summer houses](#), [log cabins](#) and [wooden gazebos](#). All of the following features are standard and are included in the price!

Key features of our windows and doors

- Lugarde doors and windows are very robust and solid.
- Our doors and windows have high quality double glazed sealed units (4+16+4 argon gas filled, with a high insulation value of 1.1).
- All windows are sealed with silicone sealant.
- Doors and windows are fitted with drainage holes.
- All doors are fitted with a 3-point security locking system (Maco brand), with a hallmark.
- Doors and windows are manufactured from laminated timber. This helps to prevent warping.
- All windows and doors are fitted with rubber draught excluders.
- Sprung handle (choice of chrome or brass).
- Handy adjustable split hinges including protection covers for the hinges (choice of chrome or brass).
- Doors are fitted with aluminium wear strips to protect the threshold.
- Our crossbars have a simple click-in clip system. Very handy for painting and cleaning.
- Doors can be hinged on the right-hand side at an extra charge (as standard, doors are left-hand hinged).

You can find more information about our [windows and doors](#) here.

Roofing

- Roof shingles are standard on all pyramid and apex roofs. Choice of black, blue, brown, green or red.
- Choice of a chrome/brass ball, weathervane or weather witch (for pyramid roofs).
- The inside of the roof on our pyramid summerhouses is finished with a decorative wooden knob.
- Flat roofs will be delivered with wide aluminium roof trims, high quality EPDM rubber, glue and water outlet.
- Log cabins are finished with a beautiful metal ridge finial with the Lugarde logo.

You can find more information about our [roofing](#) here.

Key features of our posts and beams

- Foundation beams are pressure treated and fixed together with aluminium corner clips.
- Laminated posts.
- Log cabins: straight cut logs instead of diamond cut logs.
- Walls with a thickness of 68 mm have a double tongue and groove.
- Adjustable feet for all posts for our log cabins, summerhouses and canopies.
- Aluminium feet are included with our detached gazebos.

High quality timber

- Our first-class spruce is from northern countries. As a result of the cold climate, trees grow relatively slowly. The growth rings are closer together, making the wood more stable and durable.
- All of our [timber](#) is kiln dried in special drying rooms to approx. 14-16% moisture content, and as a result wood shrinkage is reduced.
- All of our timber suppliers are PEFC and FSC certified. We keep wood waste and sawdust to a minimum and reuse it for other purposes.

Other advantages

- High quality [building systems](#) (Prima 3=1 system, Pro-system and log cabin system).
- Free skirting boards for internal floors.
- Drawings are specially created for your summerhouse, log cabin or other canopy.
- Free delivery to the UK mainland.
- Easy assembly with simple instructions.
- All fasteners and metalwork are supplied in a handy sports bag.
- 5-year guarantee on manufacturing or construction faults.

Explore key features in our 3D configurator

Many of our key features are also visible in our unique [3D configurator](#) for summerhouses, log cabins, gazebos and more. You can select the roof shingles, the door fitting and the ridge finish and see it in 360°!

Options

We offer many extra options for your summerhouse, log cabin or canopy. For example, you can choose from different windows and doors, floors, colour treatment or insulation. See [our options](#).
